United States Environmental Protection Agency

EPA Doubles Project Management Maturity, Improves Scheduling by up to 50 Percent

The U.S. EPA Office of Water wanted to do a better job of finishing software development projects on time and within budget. It quickly deployed Microsoft Project Server 2010 by hosting it with Project Hosts and engaged Innovative-e to customize it to the EPA’s needs. With the new solution, the Office of Water has doubled its project management maturity level, increased scheduling accuracy by 50 percent, and could save up to U.S.$1.9 million in productivity gains.

Business Needs

The U.S. Environmental Protection Agency (EPA) is the federal agency charged with protecting the environment. The EPA Office of Water is responsible for all water-related programs, including municipal water supply systems; municipal wastewater treatment facilities; and ocean, wetlands, and watershed protection.
